

Flex Path Projects Overlaid with Median Household Income Data

Median Household Income
 Median household income in 2010 inflation-adjusted dollars. The median divides the income distribution into two equal parts: one-half of the cases falling below the median income and one-half above the median. For households, the median income is based on the distribution of the total number of households including those with no income.

The **darker GREEN** areas represent a higher value of **Median household income** while the **lighter GREEN** areas represent a lower value.
